SERVICES

# Engineering Better Product Development

## Proven

Over 23 years in business with \$4,000,000 in capital equipment and 30 engineers leveraged to help over 400 product development customers

## Problem Solvers

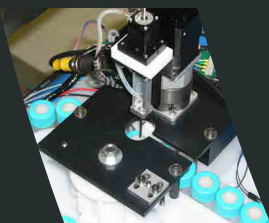

Product development is primarily the process of identifying problems and finding solutions. And that is what our engineers excel at and thrive on.

## Project Management

Well established process driven project management systems in place and utilized to ensure requirements are defined and met on time and on budget with minimal customer oversight.

## Complete Solution

Project managers and design engineers work with simulation, test, software, and manufacturing engineers to address the needs of the complete product lifecycle.
