Pioneers with a Proven Passion for 3D Printing

MANUFACTURING
TECHNOLOGY

Proven

As the first 3D Printing service provider in the Southwest, PADT has been meeting the Additive Manufacturing needs for companies large and small since 1994.

Respected Technical Prowess

With an in-depth understanding of the technologies involved in 3D Printing, the staff at PADT knows more than how to make parts. They understand how Additive Manufacturing fits into the product development process.

Multiple Technologies

Recognizing that each 3D Printing method has its own strengths and weaknesses, PADT offers multiple technologies for creating robust prototypes, tooling, and production parts.

Customer Focused

PADT handles each build with the focus it needs. Advising up-front, optimizing the build, and delivering outstanding post processing.
