

Take the Work out of Support Removal

  
Support Cleaning Apparatus

# sca3600

## Optimized Performance in a Durable System

The SCA 3600 is specifically designed for the removal of soluble support materials on 3D printed parts. The units are compatible with all Stratasys soluble support materials and corresponding build materials in conjunction with all recommended support removal concentrates – ABS, ASA, PC, Nylon, and PolyJet Resins.

## Engineered to Work

Common requests from desktop SCA users were for a larger system for bigger parts, the ability to clean many parts at the same time, and the option to remove supports from PolyJet parts. The SCA 3600 is the answer: Faster, larger, and more capable.

The SCA 3600 includes a “no-heat” option to use the device with the heater turned off, perfect for PolyJet parts.

## Product Specification

- Support Removal from ABS, ASA, PC, Nylon and PolyJet 3D Printed Parts
- Temperature presets at 50, 60, 70, and 85°C
- Available “no-heat” option for PolyJet
- User-controlled timer
- Stratasys provided cleaning solution
- Unique spray nozzle optimizes flow coverage
- Power: 230 V
- Case design complements Stratasys system aesthetics
- Whisper-quiet operation
- Size: 36.5 L x 22.8 W x 42.8” H  
927 L x 578 W x 1,086mm H
- 16 x 16 x 14” / 406 x 406 x 356mm Removable Parts Basket
- 27 gal / 102 L Capacity
- Easily accessed drain in rear of unit
- Integral hinged lid
- Stainless steel tub and basket
- Over temp and water level alarms
- Safely halts operation on alarms
- Field replaceable sub-assemblies
- CE, cTUVus regulatory approvals
